Summary

Backend engineer focused on data-heavy services and deployment tooling.

Experience

Backend Engineer, Northwind Systems

Mar 2022 - Aug 2025

- Reduced median API latency from 480 ms to 120 ms by adding query-level caching.
- Migrated 14 services to Docker and Kubernetes, cutting deploy time by 65%.
- Built a CI/CD pipeline in GitHub Actions covering 320 pytest cases.
- Designed the PostgreSQL schema behind a 40 million row event store.

Junior Developer, Halcyon Labs

Jun 2020 - Feb 2022

- Shipped 3 React features used by 12000 monthly active users.
- Automated weekly reporting with Python, saving 6 hours per week.
- Wrote REST APIs in Node.js serving 90 requests per second at peak.

Education

BSc Computer Science, Delft University - Jun 2020

Skills

Python, JavaScript, TypeScript, React, Node.js, PostgreSQL, Docker, Kubernetes, Terraform, AWS, Git, REST APIs, pytest, CI/CD, Linux

Projects

Ledger: an open-source double-entry accounting library in TypeScript with 900 GitHub stars.
